Bed Bug Solutions

HOTELS

BED BUG SOLUTIONS FOR HOTELS

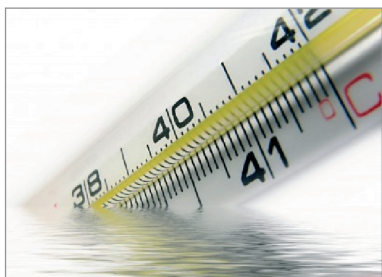

We are the bed bug experts offering solutions for hotels, from pro-active monitoring with bed bug sniffer dogs, to the latest in heat technology.

Bed Bug Sniffer Dogs

Protect your hotel's reputation by regularly searching rooms for peace of mind that your hotel is bed bug free. Should we detect an infestation, catching things at the earliest point will help prevent bed bugs spreading throughout your hotel.

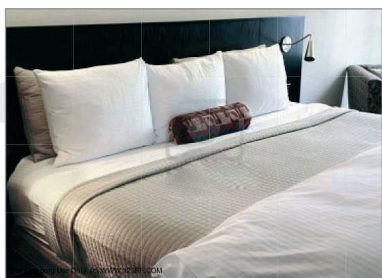

Our highly trained team of sniffer dogs can search 100's rooms a day, at a fraction of the time it takes a human and with far more accuracy.

Heat Treatment

Treat the problem quickly. Heat treatment is the only method which can kill eggs and bed bugs immediately, allowing you to rent the room the same day as treatment.

Trust K9 guarantee all treatments.

Bed Bug Management Programme for Hotels

We have tailored bed bug management programmes to suit all size hotels and budgets, whether you want a full management contract or one-off consultancy.

Our services include:

- ✓ Pro-active searches with the sniffer dogs;
- ✓ Online reports including room status and history;
- ✓ In-house staff training; Insurance; Assessments and advice.
